**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Valley temperatures likely to be close to freezing at dawn. Feeling cold over the higher fells.

Forecast for Saturday 03 Oct 2020

Weather: Cloud thickening and outbreaks of rain spreading west through the early hours. Then a cloudy day with further outbreaks of rain, these heavy and persistent at times, before clearing westwards through the late afternoon and evening. Conditions underfoot may become very wet with fast flowing water courses possible.

Maximum wind: Northerly 25-30mph with gusts around 45mph over ridges and summits, veering northeasterly during the evening.

Chance of cloud free mountain/hill tops above 800m: Little chance through much of the day with periods or persistent cloud above 600m and patches below, although far southern and western fells may see cloud become occasional above 750m at times. Chances improve through the evening as cloud lifts and clear spells develop.

Visibility: Good at times, but falling to just a few kilometres in heavier more persistent rain

Temperature: **Valleys:** Around plus 9 Celsius rising to 13 Celsius by day
At 800m: Around plus 6 Celsius
Freezing level: Above the summits.
